Professional Summary

Full Stack Developer with 3+ years of experience building enterprise applications serving 5,000+ users. Specialized in backend architecture, REST/GraphQL APIs, relational databases, and cloud infrastructure (React, Next.js, Vue.js, Node.js, PHP/Laravel, React Native/Expo). Experienced in production-style ecommerce and multi-tenant SaaS with shared backends, Stripe payments, workers/queues, and **AI-powered business features** — **AI voice agents** (Vapi), **LLM API integrations** (Gemini, OpenAI, Anthropic, Groq), semantic/visual search, AI Business Copilots, review intelligence, and AI email automation. Reduced API response time by 35%; experienced in CI/CD; delivered multi-tenant SaaS with 99% uptime.

Professional Experience

Lead Backend Developer

February 2025 - Present

Savari (UK Transportation Management Platform)

- Architected full-stack Turborepo monorepo with 5 applications (Transport Management System, Workshop Management System, Driver/Technician/Customer apps) using Next.js 16 + React 19, cutting API response time by 35%.
- Engineered multi-tenant SaaS with operator isolation, Convex reactive backend, PostgreSQL with Drizzle ORM, Better-Auth, achieving 99% uptime serving UK transport operators.
- Delivered core platform modules across **Transport Management System** and **Workshop Management System**: quote-to-booking lifecycle, dispatch allocation, finance/invoicing/reporting, dynamic inspections, work orders, parts/inventory, maintenance scheduling, and mobile offline workflows.
- Built comprehensive finance system with automated invoice generation, Stripe payment processing, PDF generation (Playwright), and credit note management with email automation (Resend).
- Developed Workshop Management System with dynamic inspection form builder, mobile offline support (React Native/Expo), work order tracking, and parts inventory management.
- Implemented CI/CD pipeline with GitHub Actions for automated database migrations, feature branch isolation, and multi-environment deployments (dev/staging/production).
- Built a **7-type subscription discount engine** (percentage, tiered, founder, free trial, custom price, etc.) with Transport Management System/Workshop Management System workspace scoping, 12-month pricing preview, compound stacking rules, and Stripe routing (Checkout vs subscription schedules vs item-level coupons) to work around Stripe's single-coupon limit.
- Designed **multi-path operator onboarding** (self-serve, admin-provisioned sales flow, additional-operator creation) with resumable Convex state, token-based owner invitations, discount-aware checkout, billing-only access gating, and automated cloning of 15+ template entities on activation.
- Shipped a **multi-tenant Twilio SMS add-on** with per-operator sender IDs, unified email/SMS templates with shortcodes, tracking-link SMS from allocations, automation workflow actions, Stripe metered billing (100 free/month + overage), and Tinybird audit logging.
- Built a **Vapi.ai AI Voice Agent add-on** for outbound quote follow-ups: quote-aware speech context engine, Sales Agent mission templates with safety policies, AI Calls work queue (40+ outcome tags), webhook-driven lifecycle, Stripe metered billing (£19/mo + usage), and ~57 Vitest tests.

Tech: Next.js 16, React 19, TypeScript, Convex BaaS, Drizzle ORM, PostgreSQL, React Native (Expo 54), Better-Auth, Turborepo, TanStack Query, Stripe, Stripe Subscription Schedules, Twilio, Vapi.ai, Resend, PostHog, Mapbox, Playwright, Trigger.dev, Liveblocks, Vitest, Zod, TailwindCSS 4

Software Engineer

June 2024 - February 2025

Computer Friends IT (UK Taxi Management Systems)

- Programmed intelligent pricing algorithm with dynamic fare calculation, increasing revenue by 20% for UK taxi operators.
- Established vehicle dispatch system reducing customer wait time by 30% through AI-powered assignment engine using real-time driver availability.
- Structured secure payment processing system with Stripe (cards), Wonderful (bank transfers), and PCI-DSS compliant cash reconciliation.
- Launched automated email notification system supporting multiple SMTP providers (Gmail, Outlook, SendGrid, Resend) with high delivery reliability.
- Produced vehicle & driver management dashboards with real-time analytics, maintenance scheduling, and document verification.
- Achievement:** Promoted to Lead Backend Developer at partner company Savari within 8 months.

Tech: PHP 8, Laravel 10, React.js, Vue.js 3, Next.js 14, Nuxt.js, TypeScript, MySQL, Redis, Stripe API, REST APIs, Agile/Scrum, Git, Docker

Software Engineer

July 2023 - June 2024

SA Systems Solutions (Promoted from Associate Engineer after 12 months)

- Completed full-stack development of enterprise HR & Payroll system managing 1,000+ employees across 5 organizations, reducing payroll processing time by 60% through workflow automation.
- Integrated ZKTeco biometric devices with real-time attendance sync using stored procedures, automated leave management with accrual rules, and multi-level salary approval workflows.
- Built 12+ interactive dashboards using ApexCharts and Chart.js with workforce analytics, attendance trends, and payroll expense reporting for data-driven HR decisions.
- Implemented recruitment module with candidate portal, interview scheduling, multi-stage interview tracking, and hiring workflow for talent acquisition teams.

Tech: Laravel 9, Vue.js 3, SQL Server 2019, T-SQL Stored Procedures, ZKTeco SDK, ApexCharts, Chart.js, REST APIs, JWT, Redis, Bootstrap-Vue, Spatie Permission, Git, Agile

SA Systems Solutions

- Developed enterprise ERP system with 12 integrated modules (HRMS, Accounts, Procurement, Inventory, Projects) serving 5 housing societies with 3,000+ residents and 1,000+ employees.
- Built comprehensive Accounting System with double-entry ledger, Chart of Accounts (5-level hierarchy), multi-currency support, and automated financial reporting reducing manual work by 70%.
- Engineered end-to-end Procurement cycle: demand requisition → quotation comparison → PO generation → GRN → invoice → payment tracking with vendor management and three-way matching.
- Created real-time Inventory Management with stock valuation (FIFO), multi-location tracking, issuance/return workflows, barcode system (Vue-Barcode), and aging analysis reports.
- Implemented multi-tenant architecture with OAuth2 (Laravel Passport), RBAC (Spatie Permission), multi-database connections (4 DBs), and real-time features using Laravel Echo + Socket.io.

Tech: Laravel 9, Vue.js 2, SQL Server (Multi-DB), T-SQL Stored Procedures, OAuth2 (Passport), Spatie Permission, Socket.io, Laravel Echo, Pusher, DomPDF, Maatwebsite Excel, Vue-Barcode, Bootstrap-Vue, Redis, Git

Software Development Intern

2021 - 2022

IT Service Department, Government College University Faisalabad

- Contributed to Student Portal System as Final Year Project in 2-member Agile team, reducing administrative workload.
- Created modules including student records, course outlines, timetable generation, assignment submission, QEC faculty ranking, fee management, library integration, and secure authentication.
- Set up secure file upload system with validation, automated deadline tracking, and email notifications.
- Participated in requirements gathering, tested system with students, and applied Agile/Scrum methodology with Git version control and code reviews.

Tech: PHP 7, Laravel 8, React.js, JavaScript, HTML5, CSS3, MySQL 8, REST APIs, JWT, Bootstrap, Git, Agile/Scrum

Projects

AI-Powered Ecommerce Platform

Full-Stack Personal Project | [GitHub](#) | [ecommerce-nextjs-yasir.vercel.app](#) | [EAS Android Build](#)

- Built a production **Next.js 16 + Convex** ecommerce monorepo (web storefront, admin dashboard, Expo mobile) with catalog, promotions, reviews, Stripe Checkout/COD, server-side pricing, order tracking, email/newsletter, and Vercel deployment.
- Implemented **AI-powered discovery and operations**: hybrid keyword + semantic search, visual product search, recommendations, review intelligence with AI replies, AI product/SEO content, **Vapi voice/chat shopping** (web), outbound AI review calls, **AI Business Copilot**, AI email campaigns, and multi-provider LLMs (Gemini, OpenAI, Anthropic, Groq) with a local review-AI worker.
- Extended the platform into a **React Native/Expo (Expo Router)** mobile app on the same Convex backend, with native catalog/checkout, Stripe deep-link return + COD, hybrid/visual search, wishlist sync after reconnect, and offline catalog browsing (AsyncStorage, NetInfo) — checkout, payments, and AI remain online-only.

Tech: Next.js 16, React Native (Expo 54), Expo Router, React 19, TypeScript, Convex, Better Auth, Stripe, Resend, Twilio, Vapi, Gemini/OpenAI/Anthropic/Groq, shadcn/ui, Tailwind CSS 4, AsyncStorage, NetInfo, Vercel

Technical Skills

Languages & Runtime JavaScript (ES6+), TypeScript, PHP 7/8, HTML5, CSS3, Node.js, SQL, T-SQL	Frameworks & Libraries React.js, React Native, Expo (Expo Router), Vue.js 2/3, Next.js 16, Nuxt.js, Laravel 8/9/10, Express.js, Redux Toolkit, jQuery
Databases & Caching MySQL 8, PostgreSQL, SQL Server 2019, MongoDB, Convex, Redis, Database Design, Query Optimization, Stored Procedures	APIs & Integration REST APIs, GraphQL, WebSockets, Stripe API, Vapi.ai, Twilio SMS/Voice, Google Gemini, OpenAI, embeddings/semantic search, visual search, PayPal, JWT, OAuth 2.0, Third-party Integrations, Microservices
DevOps & Tools Git, GitHub, GitLab, Docker, CI/CD, Agile/Scrum, Jira, VS Code, Postman, npm, Composer	Cloud & Services AWS (EC2, S3), Vercel, Expo EAS, Neon, Firebase, SendGrid, Resend, Anthropic, Groq, Pusher, Trigger.dev, Posthog, Intercom

Education

Bachelor of Science in Computer Science Government College University Faisalabad CGPA: 3.65/4.0 2018 - 2022
